

Introduction to Electronic Trading with Harris Scarfe

Cross Dock –Local Suppliers

Harris Scarfe is committed to working with our suppliers to best service our customer's requirements in the most cost effective, efficient and timely manner.

To achieve this, Harris Scarfe requires that all deliveries to our Cross Dock DC's be compliant to our electronic trading standards. This means that each supplier needs to be technically accredited to trade with us via EDI and invest in the required infrastructure or outsourcing to achieve this.

At a high level, this means that Harris Scarfe will electronically transmit orders via EDI from our systems centrally, to each supplier or their agents and we expect each supplier /agent to supply the goods packed and labelled as per our requirements and with each delivery preceded by an electronic shipping notice .

Harris Scarfe DC's will then process each delivery electronically and send consolidated requirements to our store on your behalf, all of this processing and dispatch is managed electronically on a paperless basis..

Longer term, Harris Scarfe will further develop our current electronic trading platform to cater for electronic payment systems and processes to replace the current manual invoice requirement.

New local suppliers to Harris Scarfe can meet our Electronic Trading requirements by-

1. Investing in the required electronic trading infrastructure to meet Harris Scarfes requirements directly.
2. Work with Electronic trading partners to meet our requirements.
3. Outsource the electronic trading and logistics delivery process entirely to a 3PP who meets our requirements.
4. Meet Harris Scarfes Electronic Trading requirements by working with our Web based Platform Webcom (provided free to suppliers by Harris Scarfe).

Each supplier should review the above options and choose whichever best suits their business and will provide the best outcomes for our Harris Scarfe customers.

Please note that options 1. , 2. and 3. require suppliers /agents to undergo a testing and accreditation process before orders can commence.

To assist in this decision making process, please review fully the documentation and information provided - <http://www.harrisscarfe.com.au/about-hs/vendors.html>

Or for further assistance -Harris Scarfe Accreditation Support - 08 8150 5742 or email hsediaccrreditation@harrisscarfe.com.au

Direct to Store Local suppliers

Harris Scarfe store deliveries do not do not currently require the EDI platform as our stores do not expect ASN's nor have the ability to scan receive EDI orders.

Suppliers can elect to receive EDI transmissions of orders without the requirement for ASN transmission and Scan labelling to our EDI standards. This would require suppliers to have at least an EDI receiving capability.

Suppliers may also take advantage of Option 4 above that also allows receiving of orders via our Web based platform Webcom and also offers label printing options.

Cross Dock -Overseas Suppliers

All Harris Scarfe import orders are subject to the same electronic trading standards as are our local cross dock suppliers , however , Harris Scarfe utilises the electronica trading capabilities of our Global Freight Forwarder Cargo Services to maintain/provide the capability of electronic order receiving, scan labelling and Electronic ASN transmission on behalf of Harris Scarfe overseas suppliers.
